Portfolio: <https://shreyaportfolio15.netlify.app/>

Profile

Full-stack web developer with expertise in MERN stack, backend APIs (Express.js, Flask), and production deployment (Vercel, Render, Google Cloud Run). Experienced in building scalable web applications with realtime features, AI/ML integrations, and cloud infrastructure. Strong foundation in databases, REST APIs, and full-stack architecture.

Education

Kolhapur Institute of Technology, Kolhapur	Jun 2023 – Jun 2027
<i>Bachelor of Technology in Computer Science and Engineering (Data Science)</i>	CGPA : 8.76/10
Chate Jr. College of Science, Kolhapur	HSC Feb-2023 : 80%
Holyden English Medium School, Kagal	SSC Feb-2021 : 87%

Projects

VineGuard | Grape Leaf Disease Detection

- Developed a 4-layer CNN using TensorFlow & Keras for real-time grape leaf disease classification with <1s inference.
- Built a user-friendly interface with image upload and scan history features.
- Deployed the application on Google Cloud Run with a FastAPI backend, ensuring client-side privacy.

Tech: Python, TensorFlow, Keras, FastAPI, React/Vue, Google Cloud Run

Creative Cart | Full-Stack E-Commerce Platform

- Built an artisan marketplace with dual-role authentication for buyers and sellers.
- Implemented product upload, wishlist, shopping cart, and secure checkout functionality.
- Integrated Firebase Authentication, Firestore, and Storage for real-time inventory management and image storage.

Tech: HTML, CSS, JavaScript, Firebase (Authentication, Firestore, Storage)

Smart Document Classifier | AI-Based ML Application

- Built a full-stack document classifier achieving 94% accuracy using TF-IDF, all-MiniLM embeddings, and Tesseract OCR on 1,000+ documents.
- Optimized Flask inference, reducing latency by 60%.
- Deployed the application on Vercel and Render with a Next.js frontend and Flask backend.

Tech: Python, TensorFlow, Tesseract OCR, TF-IDF, all-MiniLM, Flask, Next.js, Node.js, Express.js, SQLite

Technical Skills

Languages: Java, Python(Medium), SQL, C++ (Basic)

Front end: HTML5, CSS3, JavaScript (ES6+), React.js

Backend: FastAPI, Flask, Node.js, Express.js

Databases: MySQL, PostgreSQL, SQLite, Firebase Firestore

AI/ML: TensorFlow, Keras, Scikit-learn, CNN, TF-IDF, all-MiniLM, Tesseract OCR

Cloud & Deployment: Google Cloud Run, Firebase, Vercel, Render

Tools: Git, GitHub, VS Code, Prisma, Firebase Authentication, Firebase Storage

Core Concepts: REST APIs, JWT Authentication, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Machine Learning, Deep Learning, NLP

Achievement

- Second Runner-Up – Problem-Based Learning Competition for Creative Cart project at KIT College of Engineering
- Published Research Paper – "Online Marketplace Platform for Artisans" in IJSREM Journal, Volume 05 (May 2025)
- Vice President – ACADS Student Departmental Club (2025-26), leading initiatives and coordinating technical events
- Design Associate – ACADS Student Departmental Club (2024-25), contributing to design and branding activities
